DWA_08 Discussion Questions

In this module you will continue with your "Book Connect" codebase, and further iterate on your abstractions. You will be required to create an encapsulated abstraction of the book preview by means of a single factory function. If you are up for it you can also encapsulate other aspects of the app into their own abstractions.

To prepare for your session with your coach, please answer the following questions. Then download this document as a PDF and include it in the repository with your code.

_____

1. What parts of encapsulating your logic were easy?

To create variables to use in one function to use for encapsulating.

_____

2. What parts of encapsulating your logic were hard?

Just to get everything to work in one function and by abstracting and encapsulating everything.

_____

3. Is abstracting the book preview a good or bad idea? Why?

Bad idea, because you need information that is not encapsulated but open to get and use.

_____
